

IMPORTANT NOTICE

The Bow River Gas Co-op Ltd. is investigating the feasibility of providing high speed internet and voice over internet (V.O.I.P.) telephones to the Little Bow Resort area. Bow River is one of 18 shareholders of Corridor Communications Incorporated (C.C.I. WIRELESS). Corridor has over 10,000 wireless internet customers on 147 carrier grade towers in rural Alberta.

In conjunction with C.C.I. Wireless we have carried out a preliminary cost analysis for the cost of construction of a tower and providing the equipment, to ensure a reliable wireless high speed internet and phone opportunity can be made available to the Bow River Gas Co-op Ltd customers in the area.

This cost analysis has shown that to make this a viable business opportunity for C.C.I., we would need to have a minimum of 100 customers commit to signing up to receive this wireless service.

The Co-op has decided to survey the residents of Little Bow Resort to see if there are enough interested parties to warrant the expenditures required to provide the equipment to provide this service.

Information on the C.C.I. Wireless rates and plans can be obtained by checking out their website at www.cciwireless.ca or by calling the Bow River Gas Co-op office and talking to Kevin Krasselt.

If you are interested in either high speed wireless internet or voice over internet phone service, please fill out the form at the bottom of this notice and forward it to the attention of Rick Thorne, Manager of the Bow River Gas Coop. You can also call the Co-op office at 1-403-654-2233 to notify the Co-op of your interest.
